SOFTWARE / TECHNICAL EXPERIENCE

ExcelAI — AI-Powered Spreadsheet Automation Platform

2026 – Present

Founder & Developer

GitHub: github.com/wadeechy18-cmd/datapilot

- Designed and built the backend in Python/FastAPI: JWT auth with refresh tokens, a PostgreSQL database via SQLAlchemy/Alembic, and a multi-provider AI chat layer (Claude, Gemini, DeepSeek, OpenAI-compatible).
- Developed a Next.js/TypeScript frontend covering auth flows, dashboard, admin, and workspace pages, with Playwright end-to-end tests.
- Built a standalone Python spreadsheet engine (pandas, openpyxl) for data cleaning, formatting, formula generation, and native chart creation, designed to run core operations locally to reduce AI/API costs.
- Implemented a workbook generator producing ready-made spreadsheet templates (invoice, payroll, CRM, budget, inventory) alongside usage tracking and rate-limiting for the platform's billing layer.
